

## Recommended Pathway for Practice Educator Development

Be involved with team support of students

Support observational students

Attend Introduction session. Dates can be found on the [Practice Support Net website/Programme Information](#)

May consider SSIP module at UWE (see below)

Lead educator for a student placement.

Attend update sessions. Dates can be found on the [Practice Support Net website/Programme Information](#)

Consider attending the Supporting Students in Practice (SSIP) module. This module covers the theory of supporting students within the practice environment. It is designed to accommodate a range of Health Care Professionals, and combines multi-professional and generic learning. The module is delivered as an online asynchronous module with no timetabled teaching to enable you to engage with the materials at a time to suit you. There is no assessment, although there is an opportunity to complete a multiple-choice quiz to demonstrate your engagement with the module. If you are looking for physiotherapy-specific training, please go to the physiotherapy educator training sessions.

Consider helping with or taking on the student coordinator role, where appropriate.
